There is an epidemic of diabetes and the problem is only getting worse. More than 220 million people worldwide have diabetes, and over 3 million people die from the consequences of the disease each year. Diabetes deaths will double by the year 2030. Diabetes mellitus affects the use of sugar (glucose) in the body, either because the body does not produce enough insulin or the cells do not respond to it. High levels of blood glucose become toxic to many tissues and organs and may result in blindness, kidney failure, brain and nerve damage, heart disease, and rapidly developing atherosclerosis. The Vitamin Cure for Diabetes can help the majority of diabetics come off all or most medications by changing their lifestyle, eating a healthier diet, starting to exercise, and taking nutraceuticals. This book provides a complete supplement program (vitamins, minerals, and other dietary supplements) that can prevent or delay the onset of diabetes. Readers will learn how to optimally manage, or even prevent, diabetes for themselves and for their loved ones. This item ships from multiple locations.
