CELLULASE PRODUCING BACTERIA:ISOLATION AND MOLECULAR CHARACTERIZATION

Cellulase Producing
Bacteria: Isolation and
Molecular Characterization

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The present work focuses on isolation and molecular Characterization of bacteria for cellulose degradation. There are many microorganism that can produce the significant amount of cellulose. From this microorganism very few produce extracellular cellulase and it can capable to complete hydrolyzing cellulose. The isolated bacteria was identified based on molecular characterization by sequencing the 16s rRNA gene. | Format: Paperback | Language/Sprache: english | 103 gr | 220x150x3 mm | 56 pp.
