A Sensor Based Water
Monitoring Platform

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Water is a basic requirement of human life and economy, and its quality is increasingly threatened by pollution. Therefore, efficient and real time measurements need to be performed on waterways to cope with the ever-growing threat of water pollution. Several water quality monitoring systems are proposed in literature. However, these systems are highly expensive and complex, they offer inaccurate pollution positions, and they do not perform auto-diagnosis to recover from faults and...
