The material for this purpose has been largely drawn from the articles on Metallurgy contributed by Prof. Bruno Kerl and others to the fourth edition of Muspratt s Theoretische, Praktische and Analytische Chemie, now being published in Germany. While many improvements in the apparatus used in assaying have been made, only a few of the most notable of these novelties have been introduced, it being believed that the implements and utensils described and illustrated in the work are sufficient for all practical purposes.
