Modern Farmyard Buildings

By Chesla Clella Sherlock

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1922 Excerpt: .following table shows the amount of materials required to build pavements of various areas, based on a 1:2:3 mixture and a thickness of four inches: After the pavement has been protected by the earth covering for a week or ten days as suggested, covering may be removed and the pavement put to use, although heavy or loaded wagons should not be driven over the concrete until it is at least a month old. A barnyard pavement subjected to heavy loads should be at least six inches thick, otherwise four inches will be sufficient. Manueb Pits Manure pits on the farm are not the modern innovation they are commonly supposed to be. The fact is that they were commonly used on Roman farms before the birth of Christ for we find Varro, a Roman writer, discussing them quite at length in one of his books. His principal...
