If an infection of 50 per cent in one gold mine employing 300 men causes a loss conservatively estimated at over \$20,000 a year, what must be the economic significance of this disease for India, with its 300,000,000 of people and from 60 to 80 per cent of them infected? d. Retarding effect on education and civilization.--A photograph on file in this office shows a group of children, no one of whom until this year had ever been in a school; no member of their parents family, of the grandparents family, or their great-grandparents family on either side had ever gone to school. We have in this family a record of v at least four generations of illiteracy due to the disabling effects of hookworm disease. In the community in which this family lives are many other families showing a similar history. I have visited many communities in which a large proportion of the children have been kept out of school by disability due to this cause. I have visited schools and have on file records of many others in which all or a large proportion of the children attending are infected. Records of the definite survey show in extreme cases an average infection among rural children of school age for whole counties running as high as 70 to 90 per cent. The statement by Dr. E. Brimont, that the disease has greatly retarded the development of French Guiana,...
