Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Automatic Path Delay Corrections to Goes Satellite Time Broadcasts The time-code system is supported by atomic clocks maintained at Wallops Island, Virginia, the point of origin for all signals to be sent through the satellites. A data-logging system monitors three television networks and Ioran-c to provide a comparison link between the Wallops Island clocks and reference standards at the nbs. A microprocessor smart clock has been developed for the user that automatically corrects for path and equipment delays and places its recovered time in synchronism with Coordinated Universal Time (UTC) generated by nbs. This clock, associated recovery equipment, and measured results are discussed in detail in this report. Key Words: Broadcast; delay correction; microprocessor; satellite; scientific calculations; time of year. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
