Forgotten Books, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Mineralogy of Southern India The characters of the rock are as follow. Colour: bluish, lead coloured black; with the polished surface jet black nearly, shewing very little of the speckled appearance of black granite, except where the surface is wetted. Fracture irregular and granular, shewing to the lens some minutely lined tabular crystals of Hornblende, and small pearly coloured splintery crystals of felspar. Structure: much the same as black granite, aggregated, of confused imperfectly fibrous and radiating crystals of a lead colour, mixed with similar crystals of pearly felspar. Structure: something resembling that of actinolite: Streak whitish. Infusible by the most intense heat, a few minute specks only intermixing slightly, but becomes whitened: is more brittle than black granite. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
