Buried under massive sand dunes that dot the planet from one side to the other, lay ancient alien artifacts that must be protected at all costs. Raine is a planetary geologist sent from Earth to map and study the small planet's topography. She soon joins Jolin, a famous botanist and biologist whose duty is to study any indigenous life forms he discovers. Together they find the giant dunes of sand that cover the planet are far from ordinary. Ancient alien artifacts lay beneath the surface and it's up to them to discover their purpose.
