Reviews

Completely among the best pdf I actually have possibly read through. It is probably the most awesome pdf we have read. You won't really feel monotony at whenever you want of your time (that's what catalogs are for about in the event you ask me).

MULTIAGENT SYSTEM TECHNOLOGIES : 8TH GERMAN CONFERENCE, MATES 2010, LEIPZIG, GERMANY, SEPTEMBER 27-29, 2010 PROCEEDINGS

[DOWNLOAD](#)

Springer-Verlag Gmbh Sep 2010, 2010. Taschenbuch. Condition: Neu. Neuware - These are the proceedings of the 8th International Workshop on Multi Agent Systems Technologies (MATES 2010), held during 27-29 September in Leipzig, collocated with the 40th Annual Conference of the Gesellschaft für Informatik e.V. (GI). The main aim of the MATES conference series consists in bringing together researchers from around the world and providing a fruitful discussion basis for exchanging ideas and sharing the latest scientific results. Since its inception in 2003, MATES has been collocated with mainstream software engineering conferences like the NetObjectDays as well as with the German Artificial Intelligence Conference (KI) and has thus strived to address the full range of agent research topics from practical applications and tools for agent technology to the theoretical foundations of multi-agent systems. In addition to the broad range of topics covered by MATES, special areas of interest (hot topics) within the field of multi-agent systems have been identified in recent years and have influenced the conferences. Multi-agent systems are communities of problem-solving entities that can perceive and act upon their environment in order to achieve both their individual goals and their joint goals. The work on such systems integrates many technologies and concepts from artificial intelligence and other areas of computing as well as other disciplines. In recent years, the agent paradigm has gained popularity, due to its applicability to a full spectrum of domains, such as search engines, recommendation systems, educational support, e-procurement, simulation and routing, electronic commerce and trade, etc. 220 pp. Englisch.
