Reviews

Very useful to all category of men and women. I actually have study and i also am certain that i am going to going to read through again once more down the road. Its been written in an exceptionally simple way and is particularly only soon after i finished reading this publication by which basically altered me, modify the way in my opinion.
(Dr. Sarai Fisher DDS)

PROJECT LUNA SUCCENDO

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | The Lunar Evolutionary Growth-Optimized (LEGO) Reactor | The Lunar Evolutionary Growth-Optimized (LEGO) Reactor Reactor is a modular, fast-fission, heatpipe-cooled, clustered-reactor system for lunar-surface power generation. The reactor is divided into subcritical units that can be safely launched within lunar shipments from the Earth, and then emplaced directly into holes drilled into the lunar regolith to form a critical reactor assembly. The regolith not only would just provide radiation shielding, but also would serve as neutron-reflector material. The reactor subunits are to be manufactured using proven and tested materials for use in radiation environments, such as uranium-dioxide fuel, stainless-steel cladding and structural support, and liquid-sodium heatpipes. The LEGO Reactor system promotes reliability, safety, and ease of manufacture and testing at the cost of an increase in launch mass per overall rated power level and a reduction in neutron economy when compared to a single-reactor system. Additional subunits may be launched with future missions to increase the cluster size and electrical power generation according to desired lunar base power demand and lifetime. | Format: Paperback | Language/Sprache: english | 345 gr | 252 pp.
