

A Sun Is Not a Gas Sphere: Illustrated Science

By Rolf A F Witzsche

Createspace Independent Publishing Platform, United States, 2016. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.It is not possible for the Sun to be a sphere of hydrogen gas that is powered by nuclear fusion from within. Many epicycles have been invented to make the concept seem plausible. All evidence points to the only possible fact that the Sun is a plasma star that is externally powered with plasma fusion occurring at its surface. The difference between the two models, which are opposite in nature, is enormous. Ironically, the Hydrogen-Sun model, which is not physically possible, is being taught in the schools, while the Plasma Sun model, for which evidence exists, is being hidden from view. The reason may be that it is difficult for people not familiar with plasma physics, to see the universe as a Plasma Universe, even while research reveals that 99.9999 of the mass of the universe exists in the plasma state; in the form of free-flowing protons and electrons. In plasma fusion on the surface of a sun, plasma is combined into atomic elements, with energy being generated in the process. The atoms for all...
