Forgotten Books, 2018. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Elementary Course in Perspective IN the following pages the author has endeavored to illustrate the mechanical application of the principles of Descriptive Geometry to the making of a perspective drawing. Two methods are used: the Method by the Use of the Plan, where the orthographic projections of rays are used, and the Method by Scale. In the former, all details should be drawn with instruments, especially if there is much mechanical labor entailed. On the other hand, the Method by Scale should serve the purpose, and is, in fact, the quicker process, where the accurate location of the leading or important points only is desired. The first method is discussed mainly for the assistance of the mechanical draftsman, whereas the second is intended for the artist and free hand draftsman. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
