paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 356 Publisher: Zhejiang University Pub. Date :2007-11-01 version 1. This book is the professional electronic information materials. which is based on modern physical ideas. concepts. methods and ideas of modern education. teaching methods based on . based on information engineering and the physical basis of the written demand. Book to the band theory as the basis of the unity and integrity of the physical theory of the electronic movement of different ways throughout the book. The book is divided into nine chapters: Introduction to the first crystal structure of the third chapter and the electronic theory of quantum mechanics and solid foundation. the fourth chapter of semiconductor physics and device theory and outlines integrated device and micro-machining confused patients. the fifth chapter of optoelectronics and photonics devices. magnetic electronics Chapter VI. Chapter VII of the superconducting Prince science. Chapter VIII of the dielectric Electronics. Introduction to Chapter medium of light. sound. electrical effects and applications. Teaching reference number 50 hours. This book can be used as the National College of Engineering students specialized electronic information-based materials. general engineering and technical personnel are also available for reading. reference. Contents: Chapter I Introduction to Solid crystal structure of quantum mechanics Chapter II Chapter III Introduction to solid state electronic devices on the basis of principles of Chapter IV Chapter V semiconductor optoelectronics and optoelectronic devices Chapter VI Chapter VII of the magnetic superconducting electronics electronics section VIII Chapter IX electronics dielectric medium in the electric power. light. sound effect bibliography ScheduleFour Satisfaction guaranteed, or money back.
