Heredity: chromosomes. 23. Application of molecular biology. 24. MCQ section. 25. Questions on theory section. "This text deals with the numerous concepts in genetics and genetic engineering. These concepts have been written in simple and language with minimal use of technical terms. This full, self-explanatory text has been written especially for under-as well as postgraduate university students of genetic and genetic engineering. Profusely illustrated, the contents will ease the student's understanding of each topic covered. This text will be equally useful for biology students who study genetics and genetic engineering as a full course..."
