RareBooksClub. Paperback. Book Condition: New. Paperback. 32 pages. OCLC Number: 52598941 Excerpt: . . . 3. 0 The Dynamic Workplan Process In the traditional approach, major decisions concerning the direction of the site investigation or cleanup are generally made by the project manager after the field work has been completed. A report is prepared presenting the findings to the appropriate regulatory body. Discussions begin about whether sufficient information has been obtained to address the scientific and engineering questions of concern. Typically, several field mobilizations occur, reports are written, with many meetings held between the siteowner and its environmental consulting company and the siteowner and federal and or state regulatory agencies. In contrast, these same decisions are made in the field in an adaptive sampling and analysis program. In constructing the dynamic workplan, it is important to determine prior to mobilization what decisions will be made, how these decisions will be made, and who will make them in the field. Step 1: Select the core technical team whose responsibility it will be to prepare the dynamic workplan. The technical team should possess expertise in analytical chemistry, geology, geochemistry, geophysics, hydrogeology, and risk analysis. The team helps with data management, QA QC, risk assessment, fate and transport modeling, remedial action, community relations, and health and safety. The technical team will be responsible for: 1 ) gathering all available information for the site, 2 ) developing an initial conceptual model for the site, 3 ) identifying the technical objectives and goals to be accomplished, 4 ) supervising the field effort, making adjustments to the conceptual model based on the data produced in the field, and 5 ) evaluating the conceptual model and decisions made with respect to federal, state, and local regulations. The core technical team will be responsible for making decisions in...
