Reviews

Absolutely among the best book We have ever study. It is actually writer in easy words instead of hard to understand. I found out this publication from my i and dad encouraged this book to find out.
(Kristina Rippin)

CASCADE BOOKS, 2017. Paperback. Condition: New. Language: English . Brand New Book. What exactly is cancer? And where is God and what is love amidst the complex evolutionary development of all cancers? In *Chance, Necessity, Love: An Evolutionary Theology of Cancer*, Hummel and Woloschak address these questions that arise for many people with cancer and in all who grapple with making meaning of science about cancers. In order to do so, the authors first clarify new scientific findings about cancer and then offer faithful and wise theological perspectives on these discoveries. In doing so, they make plain what cannot and can be changed about cancer. And, in doing so, they show how cancer is an evolutionary disease that develops according to the same dynamics of chance (that is, random occurrences) and necessity (law-like regularities) at work in all other evolutionary phenomena. Therefore, they ask: where is God and what is love within the evolutionary chance and necessity operative throughout all aspects of cancer? They offer the readers thoughtful responses to this question and many others--life, death, hope, acceptance, and love--given the evolutionary nature of cancer. *Chance, Necessity, Love* is an indispensable theological work on how to come to terms with the evolutionary chance and necessity of cancer. This book restores a powerful sense of comprehensibility amid otherwise meaningless suffering. This is a most valuable contribution and by far the most satisfying theological treatment of cancer that I have ever read. --Mladen Turk, Associate Professor, Niebuhr Distinguished Chair, Elmhurst College This book is a major contribution--marked by expertise and wisdom. It combines a presentation of Cancer Science 101 with in-depth religious and theological wrestling with the mystery of cancer in a world created by a loving God. This will be an important source for many years to come. --Philip Hefner, Professor...
