LAP Lambert Academic Publishing. Paperback. Condition: New. 80 pages. Dimensions: 8.7in. x 5.9in. x 0.2in. GIS has been very important in business, mapping and charting, geospatial intelligence, health services, tourisms, and natural resources management including land use planning, natural hazard assessment and etc Urban planning is one of the main applications in which the advantages of GIS seem to be broadly accepted in general. GIS can provide the necessary planning platform for visualization, modeling, analysis, and collaboration. Other information systems for urban planning include database management systems (DBMS) and decision support systems (DSS). A database-oriented GIS, spatial and textual data can be stored and linked using the geo-relational model. Planners can also extract data from their databases and input them to other modeling and spatial analysis programs. When the planners database is combined with data from other tabular databases or specially conducted surveys, geographical information can be used to make effective planning decisions. This book describes a methodology to calculate the land evaluation base on distance for reaching activity places. A series of subjective measures of accessibility based on distances made by road network is built for Malayer City. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
