DISRUPTION OF AN ALIGNED DENDRITIC NETWORK BY BUBBLES DURING RE-MELTING IN A MICROGRAVITY ENVIRONMENT

Disruption of an Aligned Dendritic Network by Bubbles During Re-Melting in a Microgravity Environment

NASA Technical Reports Server (NTRS), et al., Richard N. Grugel

BiblioGov. Paperback Book Condition: New. This item is printed on demand. Paperback. 24 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. The quiescent Microgravity environment can be quite dynamic. Thermocapillary flow about large static bubbles on the order of 1mm in diameter was easily observed by following smaller tracer bubbles. The bubble induced flow was seen to disrupt a large dendritic array, effectively distributing free branches about the solid-liquid interface. Small dynamic bubbles were observed to travel at fast velocities through the...

Reviews

Excellent electronic book and valuable one. We have read and so i am sure that i am going to likely to study again once more in the foreseeable future. I am just happy to inform you that here is the very best book i have read during my personal lifestyle and might be he greatest book for possibly.

-- **Brendan Wuckert**

The book is fantastic and great. It generally does not expense excessive. Its been designed in an exceptionally easy way and it is simply right after i finished reading through this book by which really changed me, change the way i think.

-- **Adolfo Lindgren**
