Excerpt from Hearing Before the Special Subcommittee on Oceanography of the Committee on Merchant Marine and Fisheries, House of Representatives: Eighty-Sixth Congress, Second Session, on S. 2482 S. 2483 January 22, 1960 Up until a year or so ago, at least, only about 2 percent of the deep - sea area had been surveyed with any accuracy at all com parable to any maps on land. Part of this 2 percent was the area off the west coast of the United States where the Coast Survey ship Pioneer, using Navy funds and under the direction of the Navy, made a survey of an area of about square miles With sounding lines 5 miles apart. This is the closest grid we have anywhere in the deep sea. I am sure that everyone concerned would say that the survey by the Coast and Geodetic Survey of this area off the west coast of North America was conducted with the very highest standards of accuracy and precision. It is a most satisfactory job. The purpose of this bill is to enable the Coast Survey to do...
