STRATEGIC ASSESSMENT IN WAR (PAPERBACK)

Yale University Press, United States, 1999. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.How do military organizations assess strategic policy in war? In this book Scott Gartner develops a theory to explain how military and government leaders evaluate wartime performance, how much they change strategies in response to this evaluation, and why they are frequently at odds when discussing the success or failure of strategic performance. Blending history, decision theory, and mathematical modeling, Gartner argues that military personnel do reevaluate their strategies and that they measure the performance of a strategy through quantitative, dominant indicators. But different actors within a government use different indicators of success: some will see the strategy as succeeding when others see it as failing because of their different dominant indicators. Gartner tests his argument with three case studies: the British shift to convoys in World War I following the German imposition of unrestricted submarine warfare; the lack of change in British naval policy in the Battle of the Atlantic following the German introduction of Wolf Packs in World War II; and the American decision to deescalate in Vietnam after the Tet Offensive. He also tests his approach in a nonwar situation, analyzing the Carter Administration's decision to launch the hostage rescue attempt. In each case, his dominant indicator model better predicts the observed behavior than either a standard-organization or an action-reaction approach.
