

The Next Scientific Revolution

By Marc van der Erve

Erve Research, United States, 2013. Paperback. Book Condition: New. 203 x 127 mm. Language: English . Brand New Book ***** Print on Demand *****. An intriguing scientific discourse which suggests that the way humankind understands the natural world may soon undergo a paradigm shift toward behavioral explanations. Kirkus Reviews. There are numerous ways to view our world but, on the whole, we view our world as a material phenomenon. To explain our experience of thought, many believe that our material world is accompanied by a spiritual world. For thousands of years, this tandem determined what we think and do. But what if we are wrong? What if our world is not what we think it is? There are good reasons to believe that this is so. Faint but fundamental findings have popped up in the world of science, findings that are like dots in a puzzle. Connect these dots in a certain way and a novel picture of reality appears, a picture so familiar, yet so different that it will deeply affect the way we interpret our world, if true. Because reality is involved, this picture could give new impetus to scientific research as much as it could inspire leaders...
