## Reviews

An incredibly wonderful ebook with perfect and lucid explanations. I really could comprehended every little thing using this written e publication. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Tomas Flatley)

#### APPLICATIONS OF SOFT COMPUTING

Condition: New. Publisher/Verlag: Springer, Berlin | Updating the State of the Art | Soft Computing is a complex of methodologies that includes artificial neural networks, genetic algorithms, fuzzy logic, Bayesian networks, and their hybrids. It admits approximate reasoning, imprecision, uncertainty and partial truth in order to mimic the remarkable human capability of making decisions in real-life, ambiguous environments. Soft Computing has therefore become popular in developing systems that encapsulate human expertise. & apos; Applications of Soft Computing: Updating the State of Art' contains a collection of papers that were presented at the 12th On-line World Conference on Soft Computing in Industrial Applications, held in October 2007. This carefully edited book provides a comprehensive overview of the recent advances in the industrial applications of soft computing and covers a wide range of application areas, including design, intelligent control, optimization, signal processing, pattern recognition, computer graphics, production, as well as civil engineering and applications to traffic and transportation systems. The book is aimed at researchers and practitioners who are engaged in developing and applying intelligent systems principles to solving real-world problems. It is also suitable as wider reading for science and engineering postgraduate students. | Design of Soft Computing Techniques.- Linguistic Information in Dynamical Fuzzy Systems - An Overview.- PSO-Optimized Negative Selection Algorithm for Anomaly Detection.- Adaptation of Learning Parameters for Choquet Integral Agent Network by Using Genetic Algorithms.- Comparison of Effective Assessment Functions for Optimized Sensor System Design.- Visualization and Complexity Reduction of Neural Networks.- Modelling, Control and Optimization.- Artificial Immune Network Combined with Normative Knowledge for Power Economic Dispatch of Thermal Units.-Scheduling of Tasks in Multiprocessor System Using Hybrid Genetic Algorithms.- A Novel Modelling and Optimisation Technique for Business Processes: An Evolutionary Computing Based Approach.- Use of Multi-objective Evolutionary Algorithms in Extrusion Scale-Up.- Signal Processing and Pattern Recognition.- A Multi-Agent Classifier...
