RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 52 pages. Original publisher: Washington, D. C. (441 G St. , NW, Rm. LM, Washing ton 20548) : U. S. General Accounting Office, 1996. OCLC Number: (OCoLC)37431240 Subject: Vaccination -- United States. Excerpt: . . . B-272491 cooperation during the screening phase, or inaccurately responded to the questions about age-eligible children. Although a response rate in this range is not atypical of telephone surveys, nonresponse rates tend to run 18 Also, while higher for telephone interviewing than for personal visitation. overall response rates varied tremendously across states and urban areas, nonresponse to particular questions ranged as high as 26 percent. When combined, these factors sometimes reduce to below 50 percent the effective response rates for key questions (for example, how many times has your child received a polio vaccine), raising concerns about the accuracy of resulting estimates. Household Respondents Have The potential to use household surveys for the collection of childhood Difficulty Providing Accurate immunization data is limited by the accuracy with which household 19 Data respondents can supply information on childrens immunization status. CDC NIS Data available to before the initiation of the, including a report...

Reviews

The ideal pdf i at any time read. I am quite late in start reading this one, but better then never. You will like the way the author create this book.
-- **Eliane Bednar**

An incredibly great ebook with lucid and perfect explanations. It is actually rally fascinating through studying period of time. It is extremely difficult to leave it before concluding, once you begin to read the book.
