Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Building Technology Publications, 1983: Supplement 8 Key words: dynamic loading; earthquake ground motions; pseudo-dynamic test; reinforced concrete building; seismic design; static loading tests. The appropriate evaluation of strength and deflection characteristics of building structures is a fundamental requirement for the proper estimation of structural safety in the event of major earthquake disturbances. Various unsolved problems yet remain for this evaluation due to complexity of the combination of randomness in earthquake ground motions with nonlinear behavior of structural systems. Effects of scale and construction quality make the precise evaluation more complicated and difficult. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
