Brand New Book ***** Print on Demand *****.Based on a novel theory of how autism develops (the Dynamic Behavior Theory of Autism or DBTA), this manual details interventions for young children with autism. These interventions are drawn from DBTA and are currently being tested in research. The main concept is that the origins of the ability to imagine are impaired in children with autism as a result of early identification with objects as compared to identification with people. This impairment is hypothesized to alter the developmental trajectory and creates what we call autism.
