

## Mathematical Questions and Solutions in Continuation of the Mathematical Columns of The Educational Times Volume 13

Filesize: 8.09 MB

### ***Reviews***

*An incredibly great ebook with lucid and perfect explanations. It is actually rally fascinating throgh studying period of time. It is extremely difficult to leave it before concluding, once you begin to read the book.*

*(Josefina Yundt)*

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1870 Excerpt: .all 3.--(2) This line is also cut harmonically by every pair of cubics through the intersections of the first two.--(3) The envelope of a line cut harmonically by a given cubic and by the cubic made up by the polar line and conic of a given point is the mixed concomitant  $al^2$ .  $al^3$ --(4) Two cubics having the same inflexions cut harmonically any line whatever. Solution by 3. J. Walker, M.A. 1. If the two triads of points be determined by the two cubics  $(a, b, c, d)(x, y, z)$  and  $(a', b', c', d')(x', y', z')$ , it is readily found, by forming the expressions for the segments in terms of the roots, that the condition of harmonic division, as defined, is  $ad' - a'd - Z(bc' - b'c) = 0$ , or  $12$  (Salmon, Higher Algebra, p. 121). Hence the condition for two cubic curves,  $u = 0$ ,  $v = 0$ , cutting a transversal  $ax + by + cz = 0$  harmonically would be found by substituting  $-lx + -y$  for  $z$  in  $u$  and  $v$ , and operating on the result with  $12$ . But the same thing may be done without substitution by operating on  $uv$  directly, considering  $sat$  a function of  $x$  and  $y$  determined by  $ax + by + cz = 0$ . Then in the 3052. (Proposed by the Eev. W. A. Whitworth, M.A.)--A catapult is formed by fixing the ends of an elastic string (natural length = 11) at points A and A' on a horizontal...
