## Mystery of Photons and Light

By Steve Preston

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 176 pages. Dimensions: 9.0in. x 6.0in. x 0.4in. This is not a book about seeing things and looking at color and rods and cones and the eyeball. This book is about what photons actually do and what light actually is. Today's science of Bio-photonics tells us that each cell in our body and in the cells of plants emits photons and receives coded optical messages that are potentially more revealing than eyesight. The science of Anthropics helps us understand the differences between photonic energy and light. Einstein and others define our universe. In doing so they expand our awareness of photons and Light. This book provides a new view that helps us understand what light really is. This item ships from La Vergne, TN. Paperback.
