The assassination of Henry IV, the first of the Bourbon kings of France, in the streets of Paris in May 1610, was an event as decisive in the history of Europe as in that of France. It not merely ended the career of one who was, in spite of his moral errors, one of the wisest and most temperate of rulers, but it also postponed for another eight years the outbreak of a colossal European conflagration. Every country was as it were piled up with combustible materials, ready for the torch to set them ablaze, and there is little doubt that the war which Henry had been about to open, against the hereditary enemy Austria, on behalf of the two German Protestant claimants to the Cleves-Julich inheritance, would, but for his death, have become merged, as did the Bohemian revolution of 1618, in all existing European rivalries, whether religious, political, or commercial. These causes of quarrel were very closely entangled, and it is difficult to settle generally which was the most important. About the Publisher Forgotten Books publishes hundreds of thousands...
