Springer. Paperback. Condition: New. 479 pages. Dimensions: 9.2in. x 6.1in. x 1.1in. The Annual Beltsville Symposium provides a forum for interaction among scientists involved in research that is vitally important to agriculture and to the agricultural sciences. The Twelfth Symposium in this series focused on the unifying biochemical and physiological mechanisms controlling growth and development of biological systems - animals, plants insects. Unraveling the complex biochemical mechanisms associated with the sequencing of organism growth and development and identifying, locating, and manipulating key control mechanisms are essential in utilizing the full potential of biotechnology for improving the composition and quality of agricultural products and the profitability of agriculture. Accordingly, speakers directed their remarks to basic aspects of biological mechanisms in their area of specialization with consideration given to current status, future direction, potential impact, and limitations to progress. The Symposium addressed fundamental questions in: -Tissue specific gene regulation: cell division and differentiation -Mechanisms for regulating hormone concentration -Hormonal regulation of growth and development -Non-hormonal regulation of growth and development -Nutritional regulation of growth and development Because the backgrounds of the symposium attendees covered a wide spectrum in the basic biological and physical sciences, each topic was introduced by...
