TRAFFIC MANAGEMENT MODELS FOR WIRELESS COMMUNICATION NETWORK

Traffic Management Models
For Wireless
Communication Network

LAMBERT
ACADEMIC PUBLISHING

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Recent advances in cellular technology have great effect on wireless communication networks (WCNs). Performance and Quality of Service (QoS) are the key design requirements for WCNs. Performance is one of the fundamental factors in the design, development and configuration of wireless communication networks, which makes its effect realised in every walk of life. Queueing theory has been employed for the analysis and performance prediction of WCNs exhaustively. Performance modeling and analysis of...
