There is in fact a whole host of reasons why to learn how to code, computers have always made things easier and performed difficult tasks quicker than humans could ever do. With Artificial Intelligence and Machine Learning a lot of jobs done today by hand will in the future will be automated and performed by robots. However, programming is safe from automation and there will be a continued increased demand for coders. So why learn the C# programming language? One of the main reasons you should learn C# is that it is beginner friendly and was designed to be simple and easy to use. What you read in a C# program reads somewhat similar to what you read in the English language. C# takes away most of the complex detail at the machine level so you can focus on programming instead of having to focus on complicated detail. Another main reason to learn the C# programming language, which is backed by Microsoft, is the toolsets and framework available to you. Visual Studio the graphical development environment that you can use to write your code. It is widely considered as one of the most feature rich, powerful development environments on the market. It is one that is open source and offers a free licence of Visual Studio. The framework provides you will hundreds of pre-built libraries which you can use to build websites, work with file systems, implement security etc. C# is one of the most popular programming languages and...
