Intensive Sugarcane Production: Meeting the challenges beyond 2000 (Hardback)

By -

CABI Publishing, United Kingdom, 1997. Hardback. Condition: New. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. Increasing competition in the world sugar industry, combined with the need to maintain the resource base and minimise negative impacts on the environment, mean that sugar industries around the world face many complex problems. These challenges are shared by many other intensive cropping industries. However, advances in crop physiology, biotechnology, management systems, systems analysis and modelling and economics and policy initiatives offer great opportunities for these industries to meet these challenges. This book appraises the current situation and set the agenda for sustainable sugarcane production into the future. The book has been developed from papers presented at the Sugar 2000 symposium held in Brisbane, Australia, in August 1996. All the elements of successful intensive crop production are discussed. These include the biological, climatic, economic and social aspects which must be taken into account and judiciously managed. Topics addressed include new gene technologies and their potential value for sugarcane, along with using knowledge of crop physiology to bring about high levels of yield. Other issues considered include...
