Origins: Early-life solutions to the modern health crisis (Paperback)

By Susan Prescott

UWA Publishing, Australia, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.The field of epigenetics is revolutionising our understanding of how environment shapes our genes. Dr Susan Prescott, a leading childhood immunologist, shows how the application of epigenetics through Developmental Origins of Health and Disease (DOHaD) is changing scientific research and public health. A poor start to life is associated with an increased risk of disorders throughout life, including cardiovascular disease, obesity, type 2 diabetes and metabolic disturbances, osteoporosis, chronic obstructive lung disease, some forms of cancer and some mental illnesses. DOHaD has significant implications for many societies and for global health policy. Dr Prescott explains the research and shows how a focus on early life in health promotion, the exchange of knowledge between policymakers, clinical and basic scientists and the wider public, and education and training, will build capacity to assist a healthy start to life across populations.

Reviews

A must buy book if you need to adding benefit. It can be rally exciting throug reading time. I am pleased to let you know that this is the greatest publication we have read through during my very own life and may be he best publication for possibly.

-- **Mr. Kade Rippin**

Comprehensive information for book lovers. This is for all who statte that there had not been a worth studying. Its been printed in an remarkably simple way which is simply following i finished reading through this pdf where actually modified me, change the way i think.
