

Potato Crop Physiology (3): Importance of Potato Crop in the World (Paperback)

Filesize: 4.45 MB

Reviews

A high quality book and also the typeface utilized was exciting to read. This really is for anyone who stätte there was not a worthy of reading. I am easily will get a enjoyment of reading a written ebook.
(Burnice Carter)

POTATO CROP PHYSIOLOGY (3): IMPORTANCE OF POTATO CROP IN THE WORLD (PAPERBACK)

To read **Potato Crop Physiology (3): Importance of Potato Crop in the World (Paperback)** eBook, you should refer to the button below and download the ebook or gain access to additional information which are highly relevant to POTATO CROP PHYSIOLOGY (3): IMPORTANCE OF POTATO CROP IN THE WORLD (PAPERBACK) ebook.

Createspace Independent Publishing Platform, United States, 2016. Paperback. Condition: New. Large Print. Language: English . Brand New Book ***** Print on Demand *****.Students, researchers, scientists, potato growers, readers, libraries, consumers and others need some new knowledge and information about potato crop. Therefore, the scientific basis for improving potato production is needed. One of the major objectives for this series in the title (Importance of Potato Crop in the World) has been to give more information and knowledge as a scientific basis for improving potato production through the world. Therefore, this volume investigated new contributions towards an understanding of the role of PGRS, Nitrogen and chitting tubers on tuberization and yield of potatoes under British weather conditions. Very famous journals like Potato Research, Irish Journal of Agricultural, Food Research, Annals of Botany, Plant Biotechnology and others were used as resources to support our information. Two field experiments were conducted to study response of potato yield (Pentland Crown) to nitrogen fertilizers and plant growth regulators. Experiments were set out in a complete randomized block design. First study concentrated on time of application with a mixture of NAA 40mg/l + BAP 4mg/l pre planting and at tuberization as a first factor. Second factor was application of nitrogen fertilizer (0, 100, 200 kg/ha). Third factor was chitting tuber seeds under short and long day conditions. Second study designed as a factorial experiment to study the interaction between time of application of N fertilizer at 100kg/ha (Nitram 34.5) and mixture of NAA 40mg/l + BAP 4mg/l pre planting, at tuberization and post tuberization on yield. It is concluded that tuber yield of potatoes can be regarded as the result of summation of many developmental processes stolon initiation, stolon development, the proportion of stolons which establish tubers, the growth rate of initiated tubers and duration...
