Abhinav Publications, New Delhi. Hardcover. Book Condition: New. First Edition. 165pp. This book deals with Programme Evaluation and Review Technique (PERT), an integrated methodology for planning, scheduling and controlling of programmes and projects, with special reference to a service sector like Health and Family Welfare. The time and functional relationship between different tasks of a programme or project are explored through the development of PERT networks. It treats extensively the estimation of different types of resources required, their costing and the optimization of programme costs and programme duration to achieve specified objectives. The development of information systems for monitoring and control of programmes and projects based on PERT is discussed. The methodologies are extensively illustrated to provide insights into their application. This book fills a void in the availability of such literature on Modern Management Methods, oriented towards the Health and Family Welfare sector. Its emphasis is on providing both knowledge and skills in the use of PERT Methodology for more effective management of programmes and projects.
