Reviews

A brand new electronic book with a new standpoint. It is written in basic phrases rather than confusing. It has been designed in an extremely basic way which is merely right after I finished reading through this publication where it basically altered me, change the way I believe.

A man fires at an object moving with a given velocity in a given direction. The velocity of the ball is such that it would have hit the object, if at rest, in one second. How far ahead of its apparent position must he aim to hit the object? 10. Show that the effect of centrifugal force is to lessen the weight of a body m at the latitude X by $\frac{v^2 \sin X}{g}$, approximately, the 20° earth being assumed to be a sphere whose diameter is 8000 miles. 11. Two weights, $3P$ and P , move on two planes each inclined to the horizon at an angle of 45° , and are connected by a fine string which passes over their common vertex. Find the acceleration of their centre of gravity. What is its locus? 12. Explain the terms potential energy, kinetic energy. Given a smooth tube bent into the form of n equal inverted V s: the tube is held in a vertical plane, with the summits of the inverted V s in a horizontal line; show that if a particle be projected up the tube from one end with a velocity greater than that due to falling under the influence of gravity through a distance equal to the height of the V , it will emerge from the tube with unchanged velocity. SET VI. EUCLID. 1. Construct a triangle of which the sides shall be equal to three given straight lines. What condition...
