The general plan of procedure during the year 1892, did not differ materially from that pursued in the preceding years, and was steadily followed with the sincere purpose of furthering increased protection to human life and the better promotion of the public health. Of the methods employed, there may be mentioned in part, the dissemination of sanitary literature, which, by equitable distribution in proportion to population reached every community in the State; the distribution of documents relating to communicable diseases and means of prevention; by sanitary investigations of premises where sickness from contagious and infectious diseases was...
