

## Fabrication Of Organic Thin Films For Solar Cell Applications

Filesize: 2.53 MB

### ***Reviews***

*An exceptional book and also the font utilized was intriguing to read. This is for all who statte there was not a worth reading. It is extremely difficult to leave it before concluding, once you begin to read the book.*  
*(Prof. Tyson Hilpert)*

## FABRICATION OF ORGANIC THIN FILMS FOR SOLAR CELL APPLICATIONS

LAP LAMBERT Academic Publishing. Paperback. Condition: New. 84 pages. Dimensions: 8.7in. x 5.9in. x 0.2in. Organic solar cells have recently shown great promises as a low cost source of low carbon electricity; their efficiencies have rapidly improved from 3 in 2007 to over 10 today. We report on the fabrication of some novel conductive polymers and PCBM blend active layer in mixed solvents. Optical absorption of the active layers was analyzed using UV-visible spectral studies in the wavelength range from 300 to 800 nm. The surface morphology of the active layers deposited with different parameters was examined using Atomic Force Microscopy. The current density-voltage (J-V) characteristics of photovoltaic cells were measured under the illumination of simulated solar light with 100 mWcm<sup>2</sup> (AM 1.5G) by an Oriel 1000 W solar simulator. We also notice that both the bottom-up and top-down approaches have played important roles in advancing our fundamental understanding of this new class of nanostructures. Finally we attempt to look into the future and offer our personal opinions on what the future trends will be in organic solar cell research. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
