Excerpt from Applied Science, Vol. 26: Incorporated With Transactions of the University of Toronto Engineering Society; May, 1913 to April, 1914 A point which is often worthy of consideration is the fact that the expenditure on a concrete building is nearly all local. The materials for the concrete are, as a rule, available in the vicinity of the building and the labor required may be unskilled. A steel building on the other hand must be put up by experts and the steel in most cases is manufactured and fabricated far from the scene of erection.
