Off-Grid Power: (FREE Bonus Included) 25 Tips How To Build Your Own Wind And Solar Power Generating System Have you ever considered having solar or wind power on your property? Certainly if you have thought about living off the grid this is of prime importance. Being able to generate your own electricity will help to ensure your home has all the modern conveniences and still retains a rustic charm! More importantly, you will not need to pay an energy company again! At first the prospect of creating your own power supply will seem very daunting; especially if you little experience of this type of project. However with a little guidance and some research you can quickly create your own system. In fact, you may be surprised at how simple it is. This book does not aim to give you a step by step guide; instead it looks at the various things which can be completed to make your installation both smoother and successful. Much of this is common sense and correct application: Understand why you may wish to undertake a project like this and the importance of power. You may also wish to consider how much of an impact you wish to make to the surrounding area. Being off-grid can be for survival purposes; in which case you do not want to draw too much attention to the facilities you have. Look at eight tips which will help you plan your system properly. A further nine tips will help to ensure your install goes smoothly. You will...
