MATHEMATICAL FOUNDATIONS OF NEUROSCIENCE

Springer-Verlag New York Inc. Paperback Book Condition: New. Paperback. 422 pages. Dimensions: 9.1in x 6.1in x 0.8in. One can say that the field of computational neuroscience started with the 1952 paper of Hodgkin and Huxley in which they describe, through nonlinear partial differential equations, the genesis of the action potential in the giant axon of the squid. These equations and the methods that arose from this combination of modeling and experiments have since formed the basis for nearly every subsequent model for active cells. The Hodgkin-Huxley model and its simplified equations that are derived from it have inspired the development of new and beautiful mathematics. Dynamical systems and computational methods are now...
