By Chowdhury, Md. Tusar / Chowdhury, Emdadul Haque

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | PPR In Sheep In Bangladesh | Peste des petits ruminants (PPR) is a devastating and killer disease of domesticated small ruminants particularly sheep & goat. The present study was conducted on the seroprevalence of PPR in sheep in different farms of Bangladesh. Blood samples were collected from 100 non-vaccinated and apparently healthy sheep of 6 months to 2 years of age from sheep farms of Bangladesh Livestock Research Institute, BAU, Kolmakanda, Netrokona and Shesh Moor, Mymensingh. Sera were separated from blood samples and tested by competitive ELISA. Data were analyzed using computerized statistical program. Among 100 tested samples, 16 were found positive (16%). It may be concluded that, in absence of vaccination, the presence of PPRV antibodies indicated that PPR viruses were circulating among the sheep population. | Format: Paperback | Language/Sprache: english | 60 pp.

### Reviews

*These types of ebook is the greatest book available. Better then never, though i am quite late in start reading this one. I am just very happy to explain how here is the very best pdf i actually have read through inside my individual daily life and can be he greatest book for ever.*

-- Camryn Runolfsson

*Extensive guideline! Its this sort of very good go through. I have got read and i am confident that i will gonna read through once more once more in the future. Once you begin to read the book, it is extremely difficult to leave it before concluding.*
