

The Anatomy and Histology of the Human Eye (Classic Reprint) (Paperback)

By A Metz

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Anatomy and Histology of the Human Eye Of the eye axis; according to Hasner, 3 to 64 millimetres. The Optic nerve sheath consists of two layers, an inner fibrous layer, an outer fibrous layer, with a layer of cellular tissue between them. Its structure will be considered hereafter, and is referred to here to aid in the description of the Optic nerve entrance, which is a point possessing considerable pathological importance in connection with glaucomatous conditions. Donders says, that of the two layers of the Optic nerve Sheath, the outer, with its vessels and nerves, penetrates two-thirds of the thickness of the sclerotica, whilst the inner. Layer immediately proceeds behind the choroid, with which some of its fibres unite, and turns outward, and is expanded on the inner surface of the sclerotica. From it, however, a number of elastic elements proceed, and pass between the individual Optic nerve bundles, to form the so-called lamina cribrosa, which is connected with but a small portion of the choroid. At this point the Optic nerve is only and exclusively surrounded by...
