Forgotten Books. Paperback. Condition: New. This item is printed on demand. 182 pages. Dimensions: 9.0in. x 6.0in. x 0.4in. Excerpt from **Chemical Experiments: Prepared to Accompany Remsens Introduction to the Study of Chemistry** This book has been prepared for use as a laboratory guide to accompany the study of Remsens Introduction to the Study of Chemistry. The experiments included in the course are essentially those in the last edition of the Introduction. Minor changes have been made in many of them; essential changes in a few. If the directions are followed, the average student will experience no difficulty in carrying them out successfully. The numbering of the experiments in the Introduction has been followed in this book; additional experiments have been inserted, and designated as 15a, 25a, 25b, etc. In the latter class will be found a small number of experiments not contained in the Introduction, but which have been inserted here in accordance with the recommendation of the Committee on Secondary School Studies, whose report was published by the United States Bureau of Education in 1893. As many of the experiments there recommended have been inserted as seemed to the authors to be of advantage to the student following this course, the time at disposal and the facilities of the average laboratory being taken into account. In some cases it may be that in laboratories not completely equipped fairly satisfactory results may be obtained with simpler apparatus. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
