RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 20 pages. Original publisher: Golden, CO: National Renewable Energy Laboratory, 2011 OCLC Number: (OCoLC)712050188 Subject: Ocean thermal power plants -- Research. Excerpt: . . . Figure 6 Variation of gross, net and parasitic powers with the number of stages Required heat transfer areas for the various staged cycles are indicated in Figure 7. Heat transfer product ( UA ) increases more or less linearly with increasing number of stages. Condenser area is about 12 smaller than that for the evaporator in all cases. Heat exchanger costs are the next highest, after the cold seawater system. It is essential to limit these costs as well, which in turn will limit the number of applicable stages for economic operation. 9 This item ships from La Vergne, TN. Paperback.

### Reviews

*A top quality ebook as well as the typeface used was interesting to see. It usually fails to charge an excessive amount of. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- **Dr. Isabell Wiza DDS**

*An incredibly great book with perfect and lucid answers. Better then never, though i am quite late in start reading this one. You will not sense monotony at whenever you want of the time (that's what catalogues are for relating to if you question me).*

-- **Nannie Lindgren Jr.**
