

## Food Webs (Hardback)

By Carol Ballard

Rosen Central, United States, 2010. Hardback. Book Condition: New. 254 x 193 mm. Language: English . Brand New Book. A food web, which is more complex than a simple food chain, is a model that shows all the possible feeding relationships between organisms that are living within an ecosystem. Because most organisms depend on more than one species for food, food webs are more accurate models than food chains. This book presents food webs and how they chart the natural processes of survival. Students will gain a foundational understanding about the transfer of energy from species to species.

### Reviews

*It is one of my favorite books. Sure, it is actually engaging, nonetheless an interesting and amazing literature. I am happy to let you know that this is basically the finest book I have ever studied inside my very own existence and might be the finest publication for ever.*

-- **Randal Reinger**

*This is basically the greatest PDF I have ever gone through right up until now. It normally fails to cost excessively. Once you begin to read the book, it is extremely difficult to leave it before concluding.*
