JOHNS HOPKINS UNIVERSITY PRESS, United States, 1997. Paperback. Condition: New. New.. Language: English . Brand New Book ***** Print on Demand *****. Current issues in the public health arena have challenged the system to broaden its traditional focus on infectious disease to include chronic disease as well. As this change in emphasis takes place, professionals must be prepared to address the special chronic health concerns of older people living in the community. This textbook meets the training needs of those professionals. Public Health and Aging examines the role of public health in the planning, coordination, and delivery of health promotion and disease prevention services to older people living outside of institutional settings. Here, experts in the areas of health care policy and care of aged persons analyze the scientific basis for the practice of public health in an increasingly aging society. Reviewing a wide range of the social, cultural, financial, and environmental factors that influence the health experiences of older population groups, the authors delve into the epidemiology of age-related chronic illnesses, program development, methodological issues, data collection and analysis, strategies for intervention, and ethics. From outlines for community-based program planning and development to discussions about the future challenges for...
