

## Transporter Bridges (Classic Reprint) (Paperback)

Filesize: 1.58 MB

### **Reviews**

*This kind of pdf is every little thing and made me seeking ahead of time plus more. It generally will not price excessive. You will not truly feel monotony at anytime of the time (that's what catalogues are for concerning should you request me).*  
*(Dr. Rosie Kuphal)*

**TRANSPORTER BRIDGES (CLASSIC REPRINT) (PAPERBACK)****DOWNLOAD**

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Transporter Bridges Five years later, an elaborate plan for a transporter bridge over the Thames, was prepared by L. Mills and A. Twyman of North Shields, with a center opening 200 feet in Width and 80 feet high. The upper platform, reached by elevators in the towers, was to have provision for pedestrian travel, so that foot passengers could cross at all times. As transporter bridges are especially suitable for crossing harbor entrances at the sea coast, the type had for many years been advocated for the water courses at New York, and in 1885, 1 /ir. John F. Anderson published a design, Fig. 1, for crossing the Hudson by means of a moving platform suspended from a high level track, supported on pairs of cylinder piers. The platform was to be long enough to always be in contact with three sets of piers, thereby insuring lateral stability. In other respects the design was quite similar to those previously prepared by Harvey Leach and H. N. Houghton, and to Haegge s plan for a rolling railway bridge. Two years previous to this Mr. Gustav Lindenthal had been granted an American patent on a transporter bridge with a traveling suspended car. During the year 1894, two important passenger cableways were erected, one near Knoxville, Tennessee, and the other at Brighton Dyke, England, the car on the former one moving on a cable with steep incline. The cableway crossing Devil s Dyke at Brighton, designed by W. J. Brewer, had a clear center span of 650 feet, the type being selected because conditions would not permit the expense of a regular bridge. -an upper unstiffened cable over the towers, with a sag of...
