

Signature in the Cell: DNA and the Evidence for Intelligent Design

By Stephen C. Meyer

HarperCollins Publishers Inc, United States, 2010. Paperback. Book Condition: New. Reprint. 229 x 152 mm. Language: English . Brand New Book. A Compelling Case for Intelligent Design Based on Revolutionary Discoveries in Science In Signature in the Cell, Stephen Meyer has written the first comprehensive DNA-based argument for intelligent design. As he tells the story of successive attempts to unravel a mystery that Charles Darwin did not address how did life begin? Meyer develops the case for this often-misunderstood theory using the same scientific method that Darwin himself pioneered. Offering a fresh perspective on one of the enduring mysteries of modern biology, Meyer convincingly reveals that the argument for intelligent design is not based on ignorance or giving up on science, but instead on compelling, and mounting, scientific evidence.
